

4. Mirrored: ChatGPT4 response (App Flow_de.homac.Mirrored_9_src_oracle_1.mhtml)

Yes, there is a logic error in the app flow.

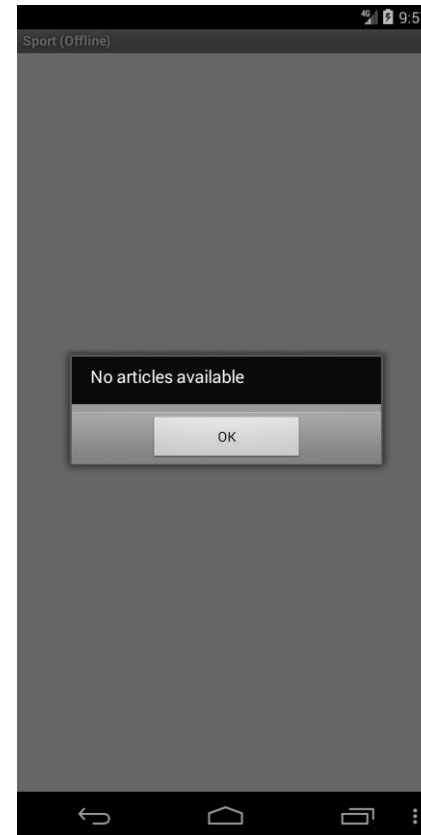

The inconsistency occurs with the "OK" button's behavior and the final output shown. After certain actions that redirect to an empty page and prompt a "back" navigation, the app incorrectly shows the "Sport (Offline)" or "International" text instead of returning to the state expected by clicking the "OK" button, which typically resets to the initial state with "No articles available."

Bug triggered Flow:

Click "menu" and "Categories".

Click any category like "Sports".

Shows empty page and no article available.

Given the internet is working, it cannot show anything.
