

## 19. Manpages: ChatGPT4 response (com.chmod0.manpages\_3\_src\_oracle\_0(13).mhtml )

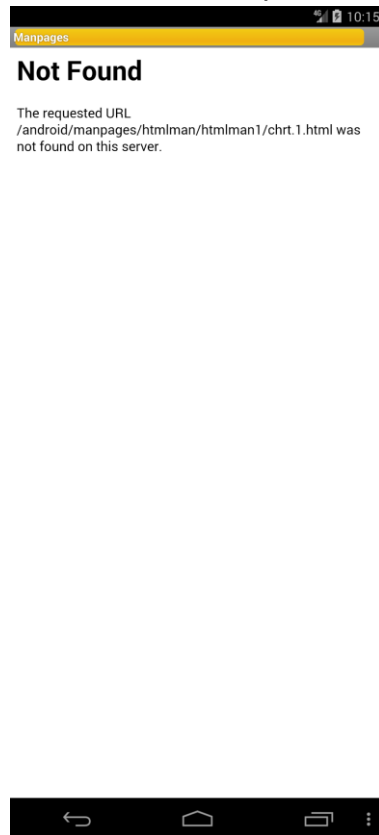

Based on the provided action sequence and the screenshot you provided, I can confirm that there is a UI error. The screenshot shows a 'Not Found' error message stating that the URL `/android/manpages/htmlman1/chrt.1.html` was not found on the server. This error message is inconsistent with the expected behavior as per the action sequence.

The action sequence ends with the user selecting 'Use online pages;' and then 'Click chrt (1);', which implies that the application should display the man page for 'chrt (1)'. Instead, the server response indicates that the page does not exist, which is a discrepancy and a UI error.

Final Decision: Yes, there is a UI error. The expected man page is not displayed, and a 'Not Found' error message is shown instead.
