

15. Bites: ChatGPT4 response (caldwell.ben.bites_4_src_oracle_0(252).mhtml)

Based on the sequence provided and the screenshot, here is what I've found:

1. Redundant Elements:

- The screenshot shows the text "test123" multiple times in different font sizes, which suggests that there might be redundant elements, as the sequence descriptions indicate that "test123" should likely only appear once as a button or text label.

2. Cut-off Text:

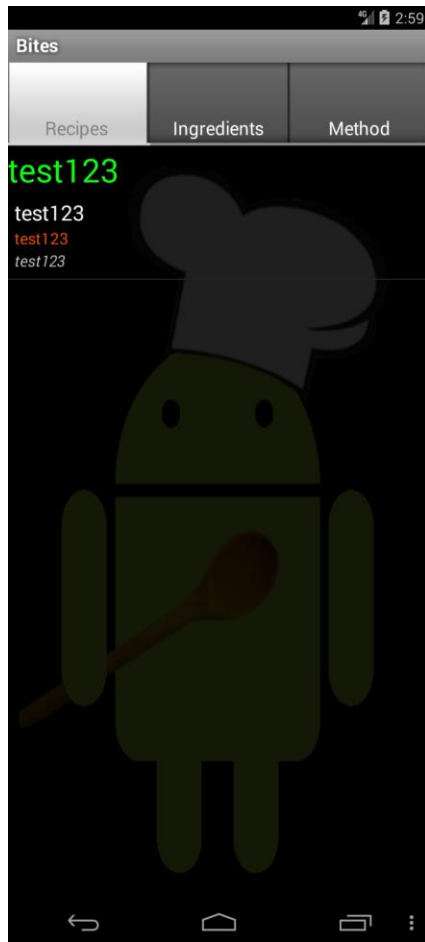

- The text "test1" followed by "2" and then "3" on separate lines could indicate that a complete statement is truncated or improperly formatted, which is an error.

3. Missing Elements:

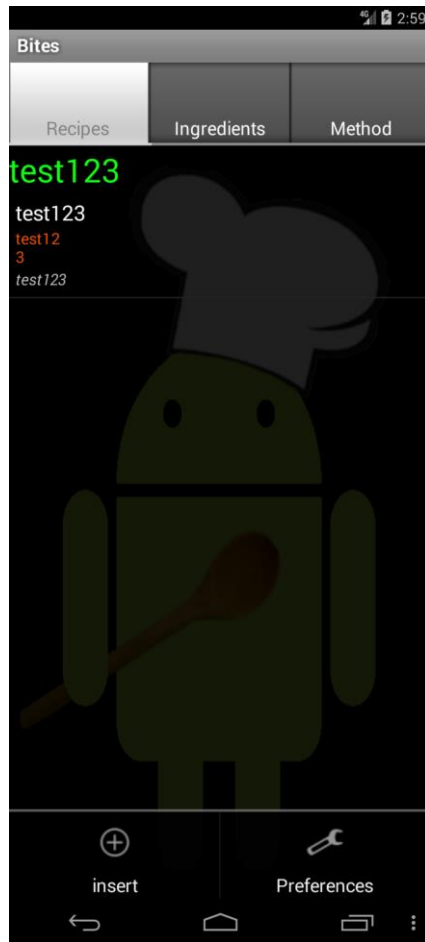

- According to the action sequence, there should be tabs labeled "Bites," "Recipes," "Ingredients," and "Method." The screenshot does not clearly show these tabs, which could either be a navigation or display error.

Given the discrepancies with redundant text elements, potential cut-off text, and possibly missing tabs, it is likely that there are UI errors present in the screenshot.

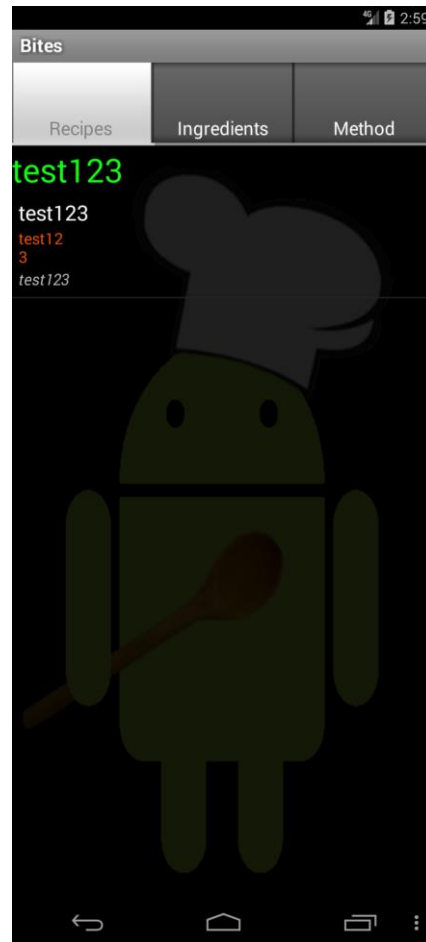

Final decision: Yes, there are UI errors present.

Click “menu”

Click “back”

In either page, “text123” is truncated into 2 lines.
