

6. Swiftfp_free: ChatGPT3.5 response (App_be.ppareit.swiftfp_free_21_src_oracle_0.mhtml)

Yes, there is a logical error. Reason: Clicking on "Running;Start FTP server;" should start the FTP server, but instead, it shows the message "Failed to start the FTP server, no wifi?". This behavior indicates a logical inconsistency.

Bug trigged Flow:

Click "Running"

It shows "Running;Failed to start the FTP server, no wifi?"

The internet is working (see the google page in browser), but app cannot work properly
