21. Mileage: ChatGPT4 response (com.evancharlton.mileage_3110_src_oracle_1(169).mhtml)

Yes, there is a UI error. The "About Mileage" page should contain a section titled "About Mileage" with text describing the app, credits for graphics, and other acknowledgements, according to the action sequence. However, the screenshot shows overlapping text on the left side where the menu should be, which indicates that the menu layer has not been correctly hidden or removed from the view. There are also readability issues due to this overlap, which is a UI error.

Final decision: UI error present due to overlapping text.

Click "menu"   Click "Setting"   Click "Select ringtone"   2 pop up windows overlay!
