16. Dalvik-explorer: ChatGPT4 response (dalvik-explorer(17).mhtml)

Yes, there is a UI error in the screenshot. The error message "Couldn't read '/dev/cpu0'" overlaps with the item "cpu_dma_latency," which makes both the error message and the item beneath it difficult to read. This overlapping of elements is a UI error as it affects the readability and overall user interface experience.

Final decision: UI error present.

Click "File systems"   Click "/dev"   Click "cpu0"   "cpu0" is clickable but cannot be read
